

# Calamansi Mist

## Description

This fruit mousse does not use cream or Italian meringue!

This recipe makes a whipped gel whose gelatine network traps air bubbles.

This gives it a very airy texture without requiring you to add ingredients that hinder the fruit's aromatic quality.

## Suggested uses

- Decorations
- Plated desserts
- Desserts, tarts and mini gateaux
- Ice cream
- Dessert glasses

## Overall composition

Composition	1000 g	100%
Gelatin powder 220 B	23 g	2.3%
Water	200 g	20%
Sugar	250 g	25%
Calamansi purée	527 g	52.7%

Expansion when whipped 340%

## Technique

Sprinkle the gelatin into cold water, then wait for 15 to 20 minutes for it to hydrate.

Heat the mixture to 120-140°F (50-60°C) so that the gelatin melts. Add the sugar, then mix with the calamansi purée at 40°F (4°C).

Place some plastic wrap on the mixture's surface and store in the refrigerator for at least 6 hours.

Whisk the gelatin mixture at medium speed until it has a shaving foam texture.

You can whisk for an extended period of time, up to 45-60 minutes depending on the amount and your equipment.
