

# Confit NH Blueberry

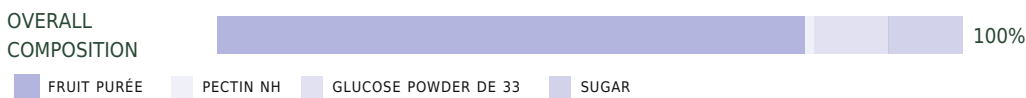

## Description

Often incorrectly referred to as a confit by pastry chefs, this product is actually a gel. Any changes you make to it can be reversed by reheating, and its texture is mostly affected by the amount of sugar around it, as well as pH levels.

## Suggested uses

- Decorations
- Plated desserts
- Desserts, tarts and mini gateaux
- Dessert glasses

## Overall composition

Composition	1000 g	100%
Sugar	100 g	10%
Glucose powder DE33	100 g	10%
Pectin NH	12 g	1.2%
Blueberry purée	788 g	78.8%

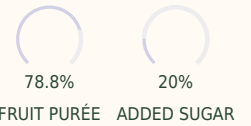

## Technique

Mix the caster sugar, glucose powder and pectin NH, then sprinkle the mixture onto the blueberry purée. Mix with an immersion blender until homogenous, then heat to 185°F (85°C), stirring all the while. Pour immediately.

## Trick

If you break up the gel as you stir, it will have a different texture and behave in a different way. You can use a piping bag to add it to your dessert.

### Confit NH Blueberry VEGETAL

#### Ingredients

Blueberry purée,  
Sugar, Glucose  
Powder de 33,  
Pectin NH

FREEZABLE

## FRUIT PURÉE USED

Wild Blueberry

## TASTING TEMPERATURE

Chilled
