

Intense Mango mousse

Description

This mousse uses traditional techniques to create a fruity flavor. It has a purée fruit base, as well as two whisked ingredients – whipped cream and the Italian meringue – and the whole thing is jellied using gelatin.

It has a stronger fruity intensity than standard recipes. This is thanks to its high fruit purée content, which has been achieved by optimizing various elements of the recipe. By replacing 40% of the cream with fruit purée in the fruit-flavored whipped cream, not only have we added more aromatics, we have reduced the amount of fat too.

Depending on the fruit and proportions used, this can imbue the tasting experience with a certain freshness. All this has been achieved while losing almost none of the frothy texture a standard whipped cream would have – in fact, the mix is slightly frothier in the case of some fruits.

For Italian meringue, the egg whites are around 88% water and 11% protein. It's the protein that makes them expand. By using albumin powder, we can replace the egg whites' water by fruit purée and thus make a fruity Italian meringue.

Suggested uses

- Plated desserts
- Desserts, tarts and mini gateaux
- Dessert glasses

Overall composition

FRUIT PURÉE		76.4%
HEAVY CREAM 36% FAT		14.1%
SUGAR		7.75%
GELATIN POWDER 220 BLOOM		1%
ALBUMIN		0.75%

OVERALL COMPOSITION		100%
---------------------	--	------

FRUIT PURÉE FRUITY WHIPPED CREAM FRUITY ITALIAN MERINGUE GELATIN POWDER 220 BLOOM

Step 1

Fruity whipped cream

Composition	235 g	100%
Heavy cream 36% fat	141 g	60%
Mango purée	94 g	40%

Expansion when whipped 220%

Intense Mango mousse

FRUIT PURÉE ADDED SUGAR

Ingredients

Mango purée,
Heavy cream 36% fat, Sugar, Gelatin powder 220 Bloom, Albumin

FREEZABLE EXPANSION WHEN WHIPPED

Technique

Combine the mango purée and the cream, both at 40°F (4°C), and whisk at medium speed until it has a frothy texture similar to standard whipped cream

Step 2

Fruity Italian meringue

Composition	186 g	100%
Mango purée	73 g	39%
Albumin	8 g	4.5%
Sugar	81 g	43.5%
Water	24 g	13%

Expansion when whipped 200%

Technique

Combine the mango purée (40°F or 4°C) and the sifted albumin in the bowl of a food processor.

Mix and leave for 15 to 20 minutes until the albumin is hydrated.

Mix the water and sugar in a saucepan and cook at 245°F (118°C), then combine this with the frothy fruit purée and albumin mixture.

Beat in a food processor at medium speed until cool (approx. 86°F or 30°C).

Step 3

Intense Mousse

Composition	1000 g	100%
Gelatin powder 220 Bloom	10 g	1%
Mango purée	200 g	20%
Mango purée	400 g	40%
Italian Meringue mango	155 g	15.5%
Fruity whipped cream	235 g	23.5%

Expansion when whipped 140%

Technique

Sprinkle the gelatin onto the smaller portion of mango purée (40°F or 4°C), then leave it for 15 to 20 minutes so the gelatin hydrates.

Heat the mixture to between 120 and 140°F (50 and 60°C) so that the gelatin melts, then combine it with the second portion of purée (40°F or 4°C). Homogenize with a mixer.

Combine approx. one third of the fruit purée with the Italian meringue, then start mixing with a whisk to assimilate their textures.

Add the rest of the fruit purée, fold it in with a spatula and finish off by gently adding the whipped cream in such a way that the mix remains light and frothy.

Pour immediately.

Trick

- To increase the expansion rate of this slightly whipped mousse by around 25%, use a standard meringue instead of the fruity meringue. The fruity flavor will be slightly less intense.

- To improve the stability of the mousse, you can add 0.2% of **konjac** along with the gelatin.

This will give it a slightly firmer texture with a silkier mouthfeel, but bear in mind that the mousse will be slightly less aromatically intense.
